SpectraZyme Gluten Digest is a targeted protease enzyme supplement formulated to promote the breakdown of gluten proteins in the stomach in order to support healthy digestion of wheat, barley, rye grains, and other gluten sources.*

This advanced formula features Tolerase® G:

Unique, proline-specific endoprotease isolated from *Aspergillus niger*

Shown to help break down gluten proteins in humans, in vitro, and in a gastrointestinal model*

Designed to be active in the acidic stomach environment*

Clinically demonstrated to help break down gluten before it reaches the small intestine, which is key to supporting health outcomes*

Benefits:

Promotes healthy digestive function*

Designed to offer a more reliable and efficient approach for gluten digestion support*

Provides digestive support for those avoiding dietary gluten*

Convenient packet option also available
