## Zinc Glycinate - 120c

### Highly Absorbable TRAACS® Amino Acid Chelate\*

**Zinc Glycinate** features the 100% fully reacted TRAACS® zinc glycinate chelate by Albion® Advanced Nutrition. Zinc is essential for the development and proper functioning of the reproductive organs, including healthy prostate function, and has been shown to support healthy immune system function.\* Zinc also supports enzyme activity associated with tissue synthesis, energy metabolism, and bone mineralization.\* Zinc Glycinate is readily bioavailable and easily absorbed as an intact chelate.\* It is superior to other forms of zinc because it does not get ionized in the gut before it is absorbed.\* Instead, it appears to be metabolized in the body right at the target tissue.\* Deficiencies in zinc can lead to an impaired immune system, decreased glucose metabolism, hormonal imbalance and slower wound healing.\*

**Serving Size: 1 Capsule**

**Servings Per Container: 120**

#### **One Capsule Contains:**

Zinc (TRAACS® zinc glycinate chelate) ..... 20 mg

**Other Ingredients:** HPMC (vegetable capsule), MCC (microcrystalline cellulose), rice flour, ascorbyl palmitate, silica.
